

Q_No	Quiz_Topic	Question	Option1	Option2	Option3	Option4	Option5
1	Mean Mock	Which of the following tools is used to debug Node is application	JSLint	ESLint	EventEmitter	Node Inspector	NA
2	Mean Mock	Given Following Javascript code what will be the output? <code>Var val1=[1,2,3]; var val2=[6,7,8]; var result = val1.concat(val2); document.writeln(result)</code>	1, 2, 3	1, 2, 3, 6, 7, 8	Error	6, 7, 8	NA
3	Mean Mock	Which JQuery function is used to prevent code from running, before the document is fully loaded?	<code>\$(document.load()</code>	<code>\$document.ready()</code>	<code>\$body.onload()</code>	<code>\$body.ready()</code>	NA
4	Mean Mock	What are the methods used to provide effects in JQuery?	Show()	Hide()	toggle	All of the above	NA
5	Mean Mock	_____ is the command line tool that installs updates or uninstall Node packages ?	package-manager	npm	repl	package-installer	NA
6	Mean Mock	What is the default ECMAScript target version given by -t parameter of tsc compiler?	ES3	ES6	ES2015	ES2016	NA
7	Mean Mock	Where can you place styles that are only used by a single component in angular application?	in the global style.css	in the app.component.css	in the module	in the html file	NA
8	Mean Mock	In Angular which decorator is used to create your own custom-defined pipe?	a) @Pipe	b) @Piped	c) PipeModule	d) @PipeDeco	NA
9	Mean Mock	where can you put Javascript code inside in HTML Page	In <HEAD> section only	In <BODY> section only	Both a and b	None, it can exist in external file	NA
10	Mean Mock	The process by which the browser decides which object to trigger event handlers is ____	Event Triggering	Event Listening	Event Handling	Event Propagation	NA
11	Mean Mock	Which of the following statements is false about Node.js	IO operations are non blocking	Ideal for synchronous and CPU intensive tasks	Supports caching of modules	Application can be scaled horizontally and vertically	NA
12	Mean Mock	Given HTML code: <code><select name="myselect" id="myselect"> <option value="in">internet</option><option value="js">javascript</option><option value="vs">vbscript</option><option value="as">ASP</option></select></code> Which of the following correct code for retrieving dropdown list using javascript	<code>var x = document.getElementsByTagName("select")</code>	<code>var x = document.getElementById("myselect")</code>	Both a and b	None	NA
13	Mean Mock	How many \$rootScope an angular JS application can have?	Zero	One	Two	Infinity	NA
14	Mean Mock	Lets say below code is run on node. Which of the following is a valid URL for user to get response as "Hello John"? <code>Var express = require('express'); var app = express(); app.get('/:name',(req,res)=>res.send("Hello"+req.params.name)); app.listen(4000);</code>	localhost/john	localhost:4000/john	localhost?name=john	localhost:4000?name=john	NA
15	Mean Mock	What will be output of the following Javascript code; <code>var num = parseInt("123abc");</code>	123	123abc	Exception	NaN	NA
16	Mean Mock	Node.js is a _____ language	Server Side	Client side	Intermediate	Network side	NA
17	Mean Mock	In Angular which decorator is used to configure your module class?	a) @NgModule	b) @NgConfigure	c) NgApp	d) @NgAngular	NA
18	Mean Mock	Which of the following can be used to convert javascript object to string	JSON.Parse()	JSON.Stringify()	JSON.Null()	JSON.Objectify()	NA
19	Mean Mock	As the webapp architecture is concerned which type of testing is used as a integration testing?	Component	Content	Navigation	Both a and c	NA
20	Mean Mock	In Node.js ____ class is used to consume custom events	Event Emitter	Events	NodeEvent	CustomEventHandler	NA
21	Mean Mock	What will following code return? <code>Function constfunc(){ var func = []; for(var i = 0; i < 10; i++) func[i] = function(){return i;}; return func;} var func = constfunc();</code>	return an Array	9	0	None of the above	NA
22	Mean Mock	How many callback functions can be attached to handle a request in Express	Exactly one	Two	Three	Unlimited	NA
23	Mean Mock	Predict the output of following javascript code <code><script>let js = "JS Programmer"; console.log(typeof js); js = 1; console.log(typeof js); </script></code>	string number	string string	null null	string integer	NA
24	Mean Mock	Which of the following is utility function in JQuery	Jquery.each()	Jquery.parseJSON()	Jquery.noConflict()	Jquery.conflict()	NA
25	MEAN Mock	what will be output of the following code in angular html page ; <code><div><? Result: ((2 + 2)) </?></div></code>	Result:((2+2))	Result:4	Result:(2+2)	None of the above	NA
26	MEAN Mock	Where you can define child route in angular application	in the routes array	in the component	in the html element	in the URL	NA
27	MEAN Mock	In Javascript how you will find that which character appear in the fifth position in the string	substring	charPos()	indexOf()	charAt()	NA
28	MEAN Mock	What are the core features of Express framework	Allows to set up middlewares to respond to http requests	Defining a routing table which can work as per HTTP Method and URL	Dynamically render html pages	All of the above	NA
29	MEAN Mock	What will be output of following javascript code? <code>Function totalelements(){ var allgenders=document.getElementsByTagName("gender"); alert("total Genders" + allgenders.length); } <form><input type="radio" name="gender" value="male"><input type="radio" name="gender" value="female"><input type="button" onclick="totalelements" value="total genders"></form></code>	0	Error	2	1	NA
30	MEAN Mock	Inside which html element we put Javascript code	<script>	<js>	<scripting>	None of the above	NA
31	MEAN Mock	SetTimeout belongs to which Javascript object	Window	Navigator	History	Element	NA
32	MEAN Mock	What is the correct syntax for angular js expression	{expr}	{[expr]}	{(expr)}	{[(expr)]}	NA
33	MEAN Mock	Which is correct syntax for displaying "Javascript Programmer" in alert box?	alert("Javascript Programmer")	alert("Javascript Programmer")	msgbox("Javascript Programmer")	messagebox("Javascript Programmer")	NA
34	MEAN Mock	SetTimeout method is used to	make a event sleep	register a function which will be invoked after certain time	invoke event after certain time	None of the above	NA
35	MEAN Mock	Which of the following is used to select all p elements with class red	<code>\$p#red</code>	<code>\$p.red</code>	<code>\$p.\$red</code>	None of the above	NA
36	MEAN Mock	Assume html element as <div id="MYID"> how can you select this element using JQuery	<code>\$("#MYID")</code>	<code>\$(".MYID")</code>	<code>\$(".MYID")</code>	None of the above	NA
37	MEAN Mock	Which of the method in JQuery is used to hide selected element	hide()	hidden()	Invisible()	fade()	NA
38	MEAN Mock	Which of the following is true about EventEmitter on property?	on property is used to fire an event	bind a function with the event	on property is used to locate an event handler	None of the above	NA
39	MEAN Mock	Which of the following can send a rendered view template in Express JS?	app.render(view,[locals],callback);	res.render(view,[locals],callback);	Both a and b	None of the above	NA

40	MEAN Mock	Which of following is an unit testing framework for Angular Application	jasmine	karma	protractor	None of the above	NA
----	-----------	---	---------	-------	------------	-------------------	----
