

Mock SE

Q) Which of the following appears in requirements in Scrum

- a) Feature
- b) Release burn down chart
- c) Team Rate of Progress
- d) None of the above.

Q2) git branch is used for

- a) For creating a new branch
- b) For a creating a new repository
- c) For checking a branch got created or not
- d) None of the above

Q3) JIRA is an example of

- a) Coding tool
- b) Project management and issue tracking tool.
- c) Change control system
- d) None of the above.

Q4) what can be created with jira

- a) Scrum project
- b) User stories
- c) Sprint
- d) All the above.

Q5) In Jenkins, group of events, or job which are interlinked with one another is called as

- a) Job
- b) Sequence
- c) Work
- d) None of the above.

Q6) Build, Deploy , Test and Release is called

- a) Continuous Delivery pipeline
- b) Work cycle
- c) Job
- d) None of the above

Q7) Node in Jenkins refers to the following

- a) Port on which Jenkins runs
- b) Node js application
- c) System on which Jenkins runs
- d) None of the above.

Q8) If operating system, containers are all installed by the user in a cloud environment it is called as

- a) IaaS
- b) PaaS
- c) SaaS
- d) None of the above.

Q9) which of the following is cloud deployment models.

- a) IaaS
- b) Hybrid cloud
- c) PaaS
- d) SaaS

Q10) Docker is

- a) Server
- b) Container
- c) Programming language
- d) None of the above.

Q11) Dockerd engine represents the

- a) Server
- b) Client
- c) Software
- d) None of the above.

Q12) Docker stores the images we put in

- a) Registries
- b) Docker Image DB
- c) Database
- d) None of the above.

Q13) docker pull x , here x means the following

- a) X is a image
- b) X is a container
- c) X is a registry
- d) None of the above.

Q14) The testing xml file has got the following tag called test

- a) Test represents individual test
- b) Test represents group of tests
- c) It presents a test suite
- d) None of the above.

Q15) @BeforeTest , in TEST Ng will run

- a) Before the each Test
- b) Only before the first Test
- c) Before the application launches
- d) None of the above.

Q16) the input argument for TestNg @DataProvider is

- a) Object [][]
- b) String array
- c) Integer array
- d) None of the above.

Q17) AWS Lambda is

- a) Programming language
- b) Serverless computing platform
- c) Testing framework
- d) None of the above.

Q18) Salesforce is an example of

- a) PaaS
- b) SaaS
- c) IaaS
- d) None of the above.

Q19) Selenium is used for testing

- a) Presentation layer
- b) Service layer
- c) Dao layer
- d) All the above.

Q20) YAML files have an extension

- a) .yaml
- b) .xml
- c) .json
- d) None of the above.

Q21) Reviews is done as part of.

- a) Requirements
- b) Design
- c) Coding.
- d) All the above.

Q22) Testing against code is called as

- a) Black box testing
- b) White box testing
- c) Alpha testing
- d) Beta testing

Q23) Model used to clarify requirements is

- a) water fall model
- b) spiral model
- c) prototyping model.
- d) none of the above.

Q24) Model used to mitigate risks is.

- a) Spiral Model
- b) Water Fall Model
- c) Prototyping model.
- d) none of the above.

Q25) Explicit interfaces are part of

- a) Requirements
- b) Design
- c) Coding
- d) Testing

Q26) layering is done as part of

- a) Requirements
- b) Design
- c) Coding
- d) Testing

Q27) Cyclomatic complexity refers to

- a) maximum number of test cases we need to write
- b) minimum number of test cases we need to write.
- c) how many modules we need to write
- d) none of the above.

Q28) Checking database is opened is closed for not is

- a) Black box testing
- b) white box testing
- c) System testing
- d) Stress testing.

Q29) Unit testing is done by

- a) programmer
- b) testing team.
- c) project manager.
- d) Customer

Q30) Quality Assurance is done during

- a) requirements
- b) Design
- c) Coding
- d) All the above.

Q31) Planning deals with

- a) activity listing
- b) dependency between activities.
- c) resources required for activities
- d) all the above.

Q32) Good design is characterized by

- a) low coupling and low cohesion
- b) high coupling and high cohesion
- c) low coupling and high cohesion
- d) high coupling and low cohesion

Q33) Entity classes are identified during

- a) OOA
- b) OOD
- c) Testing
- d) Implementation.

Q34) Stress testing is an example of

- a) Black box testing
- b) White Box testing
- c) Usability testing.
- d) None of the above.

Q35) which of the following are static diagrams

- a) Activity Diagram
- b) State Chart diagram
- c) Class Diagram
- d) State Machine diagram.

Q36) Programmer proves he understood requirements is

- a) By writing test cases and then test reports
- b) By documentation
- c) By coding
- d) By unit testing.

Q37) Example of build tool

- a) logging
- b) Maven
- c) Jenkins
- d) All the above.

Q38) which comes first

- a) Epic
- b) Feature
- c) User Story
- d) None of the above.

Q39) Acceptance Test criteria is part of

- a) Requirements
- b) Design
- c) Coding
- d) All the above.

Q40) In scrum which of the following charts are made

- a) Spring burn down chart
- b) Release burn down chart
- c) Product Burn down chart
- d) All the above.
